## Announcement to reopen of THE ENTENTE Fitness Club

Recently, we received a report from a corporate member that an employee of their company was suspected of being infected with the new coronavirus. Since several of their employees use the THE ENTENTE Fitness Club, the club voluntarily decided to close temporarily from Thursday January 14, 2021 to ensure everyone's safety.

Regarding the person who was found to be infected, we were able to confirm from an investigation by the Health Center that the club was not the source of the infection, and there seems to have been no close contact between the infected person and other members and our club staff, and also no clusters have occurred within the club.

In addition, during the temporary closure, the building has been disinfected and provided with sufficient ventilation. As a result, the ENTENTE Fitness Club has obtained the opinion from the Health Center that there is no problem with reopening the club, therefore we will reopen the club from Wednesday, January 20, 2021. The corporate members concerned have been requested to refrain from using the club for the time being.

Since an emergency declaration has been issued, the following infection countermeasures will be additionally implemented.

### **[Additional safety measures when using the facility]**

- Wearing a mask throughout the building  
(excluding locker rooms and pools)
- Restrictions on conversing without a mask
- Squash courts may be used for up to 15 minutes at a time.

Thorough ventilation and disinfection will be done after use.

(Please check with the front desk on how to reserve a squash court.)

We will continue to make every effort to make sure that everyone can use the facilities safely.
